In order to help the public better understand these regulations, we have compiled a guide to the regulations on exit sign placement for buildings located in the USA. These regulations are set out by the National Fire Protection Association (NFPA) in the Life Safety Code and the International Building Code .

How High Does an Exit Sign Need to Be? - Exit Sign Warehouse

Being in a school environment can cause different safety concerns than simply working in a building with adults. Just having to change entrance and exit doors on some days or changing the fire alarm routine for a student body of over 400 was challenging at times, but we were given lots of notice to keep staff and parents informed."

A carbon monoxide detector or CO detector is a device that detects the presence of the carbon monoxide (CO) gas to prevent carbon monoxide poisoning. In the late 1990s Underwriters Laboratories changed the definition of a single station CO detector with a sound device to carbon monoxide (CO) alarm. This applies to all CO safety alarms that meet UL 2034 standard; however for passive indicators ...
