Aristotle's system • The Greek philosopher Aristotle (384-322 B.C.) developed the first widely accepted system of biological classification. • He classified all the organisms he knew into two groups: plants and animals. • He grouped organisms according to their physical structures. • As time passed, more organisms were discovered and some did not fit easily into Aristotle's groups ...

Chapter 18: Classification

CHAPTER 18 STUDY GUIDE - CLASSIFICATION. 18.1 Finding Order in Diversity. Lesson Summary. Assigning Scientific Names. To study Earth's great diversity of organisms, biologists must give each organism a name. Biologists also must organize living things into groups in a logical way. Therefore, biologists need a classification system.

Name
