A border-adjustment tax (also known as a border-adjusted tax, destination tax, destination-based cash flow tax or a border tax adjustment) is a tax on goods based on location of final consumption rather than production. It allegedly eliminates incentives for companies to reduce their tax bills through tax inversion and intangible asset relocation.

## **Border-adjustment tax - Wikipedia**

First, a border adjustment is typically allowed under an indirect tax, like an excise tax or credit-invoice VAT and not a direct tax such as a corporate income tax. Second, a tax with a border adjustment needs to treat domestic and foreign goods equally to avoid discrimination against imports.
