In MySQL 8.0, we will be introducing a new configuration parameter called `innodb_dedicated_server=bool`. When ON, this option will look at the system memory, and then automatically set the these configuration parameters using the following rules: `innodb_buffer_pool_size server_memory < 1G ? 128M (same as current default) server_memory <= 4G ? server_memory * 0.5 server_memory > 4G ? server ...`

Introducing SQL Server - All Books

Introduction. I have recently started making videos for my YouTube channel. There are several different playlists, but the one for SQL Server is probably most relevant for many people reading this blog. Currently, I am working on a series of videos that dive pretty deeply into each of the queries in my SQL Server 2019 Diagnostic Information Queries.
