### Lift The Flap General Knowledge

An aircraft is a vehicle or machine that is able to fly by gaining support from the air. It counters the force of gravity by using either static lift or by using the dynamic lift of an airfoil, or in a few cases the downward thrust from jet engines. Common examples of aircraft include airplanes, helicopters, airships (including blimps), gliders, paramotors, and hot air balloons.

Bandage the wound. Once the bleeding has slowed to a manageable level, apply a new, clean piece of gauze to the wound. If you have adhesive bandage pads, layer them over the wound, leaving 1/3 of the previous bandage exposed with each successive layering. Be sure to cover some of the ear's fur in the bandaging at the perimeter of each bandaged layer, to help keep the bandage in place and ...
