Magic Eye Tube Vu Meter

After WWII, magic-eye tubes were, besides radios, also used as an (actually) cheaper alternative to needle-based VU meters in consumer-grade tape recorders of the 1950s and 1960s.

Magic eye tuning indicator as a VU meter - BOGIN, JR.

Mr. Nixie has taken all these kits, put them in a pot, added a hefty dose of the legendary Mr. Nixie Magic, and finally the Universal Magic Eye VU-Meter was created. You can fit into this VU-Meter the most commonly available Magic Eye tubes without the need to do any soldering.

EN Universal Magic Eye VU-Meter - Nixie kits

Functions: Magic Eye can be used as an audio level indicator or a VU meter. You can see the tube light dancing with your audio signal. You can use it seperately or combine it with your devices, which is very useful and beautiful.

Amazon.com: Nobsound Magic Eye 6E2 EM87 Tube Preamp; Audio ...

A magic eye tube is an electronic vacuum tube that provides visual indication, usually in the form of green light, on an area called the target inside the tube. The target is partially illuminated with the exception of the shadow area, which varies in size and shape depending on the signal applied to the tube.

VU-meter with EM84 tube posted in electro on August 18, 2012 - 0 Comments From all the existing tubes, for sure the most interesting ones are the indicator tubes. From the 1930's when they were invented, they captivated the eyes with the greenish shimmering light, thus the "Magic Eye" term appeared.

VU-meter with EM84 tube - AntiMath

As it turns out, the VU meter is the stereotypical example for hobbyist magic eye projects, so why buck tradition? I did determine, however, that if I made such a meter, it would have to be stereo. So I ordered a second unit, put the first unit on the shelf, and subsequently got involved with other business that occupied my attention for months.

Magic Eye Tube for sale | eBay

I would start by measuring pin G on the ~6U5 eye tube. This should be the AGC voltage which should be fairly low as it is connected to the AGC. Next step would be to scope out various audio points on the circuits after the detector to try and find an audio level that is close to the previously measured 6U5 G pin.
