Tilapia feeds on green algae and hence will reduce your feeding costs. In addition algae produce oxygen during daytime which helps keeping the fish healthy. Algae grow best if the pH (acidity) of the soil is above 7 and if there are enough nutrients (fertilizers). Liming increases the pH of the soil.

The BMP manual is to be used in conjunction with the ISRTA Standards Document and the ISRTA Guidance Tool. The ISRTA are global standards that will help minimize the key negative environmental and social impacts associated with tilapia aquaculture. They are performance-based standards that, with minor exceptions, are measurable.

### Better Management Practices for Tilapia Aquaculture

Important point: There are certain tilapia farming situations where it is not practical or even possible to remove ammonia using bacteria. Aquaculture tanks or ponds that are not part of an aquaponic system can be successfully farmed using alternative ammonia elimination methods such as zeolite or aggressive aeration.
